## Professional Summary

Aspiring full-stack developer with 9 months of industry experience building web applications using Laravel, MySQL, React, and Tailwind CSS. Skilled in RESTful APIs, authentication with JWT/Sanctum, and implementing features like task management and role-based access. Passionate about clean code and continuous learning.

## Professional Experience

**Full-Stack Developer** (Intern)  
Rightmo Web Solution  
August 2024 – May 2025  
(9 months)

- RTB (Ruhunu Tourist Bureau): Full-stack development using Laravel and Blade.
- BizTrack (Business Management System): Backend development using Laravel APIs and frontend integration with Next.js.
- School Management System: Full-stack development using Laravel and Blade for academic modules such as student records, attendance, and reporting.
- Developed scalable modules for authentication, access control, and data reporting. Utilized GitHub for version control and collaborated via Trello and Jira within Agile sprints.

## Certification

**Machine Learning for Beginners**  
Sololearn  
Certificate ID: CC-LDBNGDUZ

## Education

**Higher National Diploma in Information Technology**  
2022 - 2024 (Undergraduate)  
SLIATE, Labuduwa, Galle

## Projects

**Task Management App**  
(Laravel + React + Tailwind CSS)

- Kanban-style task boards with drag-and-drop functionality for seamless task organization.
- Google social login, workspace creation, project assignment, and user-based permissions.
- Real-time team collaboration including task commenting, status updates, and multi-user workspaces.
